Professional Summary

A highly motivated Full Stack Developer with a proven ability to design, develop, and deploy full-stack web applications. With a strong foundation in front-end technologies like React and Tailwind CSS, and back-end development with Node.js and Express, I excel at building scalable, user-centric solutions. My project work, including the AI-powered study platform 'Mentixo AI', showcases my skill in turning complex requirements into clean, efficient, and accessible code. I am actively seeking opportunities to contribute to innovative projects in a challenging development role.

Technical Skills

- HTML5, CSS3, JavaScript (ES6+)
- Tailwind CSS, Git
- React, Node.js, Express.js
- MongoDB, Mongoose
- RESTful APIs, JWT Authentication
- PostgreSQL, MySQL
- Version Control (Git, GitHub)
- Python, Django
- Supabase, Prisma

Projects

Mentixo AI — Full-stack AI-Powered Study Assistant: Built a scalable full-stack AI study platform featuring conversational AI, OCR-powered doubt solving, quiz generation, and real-time analytics using Gemini API and Supabase.

DevFlow – Personal Productivity System: Full-stack productivity platform with Kanban boards, project tracking, and analytics. Built with React, Node.js, PostgreSQL, and Tailwind CSS.

Spyderman Shooting Game: An engaging shooting game featuring Spyderman as the protagonist, crafted using modern web technologies.

📊 **GraphyGen:** Python CLI tool to generate graphs from CSV data using Matplotlib.

Education

Keshav Mahavidyalaya, University of Delhi
Bachelor's of Science — Expected 2028

Additional Highlights

- Exploring Figma for UI/UX design
- Building consistent personal projects
- Active GitHub portfolio with real-world applications
